

Data:

Neighborhoods and average rent data are obtained by web scraping the following website:

<https://www.seattlemet.com/home-and-real-estate/2019/03/the-top-12-neighborhoods-in-seattle-2019-edition>

The data obtained will be the neighborhood name and the Average Rent in USD, as shown in the screenshot below.

Data obtained using the Foursquare API will also be used for the project.
